

Product Catalogue

Selecting the right mobility aids to meet your needs is an important decision. Many people use assistive devices to increase or maintain independence. Wheelchairs, rollators, walkers, crutches and walking sticks empower you to go further and fully experience the world around you — on your terms.

For over half a century, Days® has been a recognised global leader in empowering personal mobility. Fully understanding and embracing an individual's mobility needs, Days enhances and advances lives at every turn. When it comes to safety, ease of use, affordable quality, customer support and breadth of product choices, the world turns to Days.

When you select a Days mobility aid, you can expect to experience the difference. Days represents:

Boundlessness

We share our passion for removing life's boundaries, offering clinicians and individuals a broad range of mobility solutions. With a global reach, Days is always nearby.

Moving

Days is trust that moves you. We strive to inspire excitement about the possibilities of everything life has to offer. We believe your physical needs should not be a limitation, and we are here to help you propel your life — wherever you wish to go.

Knowledgeable

Days products and services support you by being built on a solid foundation of quality materials and heritage. With a firm understanding of the mobility industry, we are made to exceed expectations. You can rest assured with Days.

Compassionate

With every design, Days considers the unique needs and demands of the user. Days knows the products it creates will move both the body and spirit of an individual.

Go further with Days

Founded in 1968 in Bridgend, Wales, Days has led the industry in mobility for over 50 years. With a broad range of wheelchairs, rollators, walkers, crutches and walking sticks, Days is the brand to which the world turns to advance their lives. Our products are easy to use and ready when you need them while offering affordable quality. With a steadfast focus on safety, Days offers products that customers trust for their mobility needs.

The Days foundation rests on four central pillars: dedication, empowerment, understanding and enabling freedom.

Dedication

With a steadfast focus on product safety and ease of use, customers and clinicians can trust — and rest assured — knowing our products will take care of their mobility needs. With over a half-century of expertise, Days has a time-honoured reputation that continues to propel customers and their lives forward each day.

Empowerment

Days goes the distance with a quality, broad range of mobility aids that fit each unique individual for life's ever-changing path. Days helps empower clinicians, distributors and individuals to find the ideal solution for daily freedom of movement and motion.

Understanding

Days has developed an array of mobility support with every diverse need in mind. With extensive knowledge of the mobility industry, Days applies its empathy and understanding to produce quality, affordable products that support motion.

Enabling freedom

Navigating through life's twists and turns, Days helps keep the momentum going with a determination to uplift, support and answer each user's needs.

Mobility Accessories

Go further with Days

Days offers a broad range of mobility accessories and wet weather gear to ensure that customers have everything they need to keep them safe and organised and dry when they're out and about.

All of our products are made from quality materials with functionality and style in mind.

Economy Wheelchair Bag

The Days Economy Wheelchair Bag consists of hard-wearing waterproof polyester material with durable loops to fit securely over the handles of a wheelchair and keep it secure whilst moving.

It has a large top zipper main compartment for easy access as well as small feet to ensure stability when standing up.

The bag is specially designed to not interfere with the user pushing the wheelchair and features an additional large pocket on the front for extra storage.

The bag features an extra large storage capacity of 27 L. Size 400 x 450 x 140mm (16 x 18 x 5½").

- Hard-wearing waterproof bag
- Durable loops to secure to wheelchair
- Small feet on the bottom to ensure stability

Deluxe Wheelchair Bag

The stylish Days Deluxe Wheelchair bag features several external pockets large enough to hold clothing or a generous amount of shopping. The inside of the bag is lined and padded to ensure your belongings are safe and secure on the go. The bag consists of hard-wearing, waterproof polyester and features an internal pocket for valuables storage.

The Days Deluxe Wheelchair bag also features two side pockets storing umbrellas or drink bottles. Two durable loops ensure the bag attaches and fits securely to the wheelchair's handles.

The bag also has a rubberised top handle for extra comfort and reflective strips to ensure visibility at night. Rubberised zips allow better grip for users opening and closing the bag.

Maximum safe load 8kg.

Size 400 x 600 x 150mm (15¼ x 23½ x 6").

- Lined and padded bag for extra security
- Padded storage pockets for umbrellas or folding walking sticks
- Waterproof internal pocket

Wheelchair Cosy

This fleece blanket is designed for wheelchair users. It zips closed to keep the lower body warm and comfortable. The fleece lining is extraordinarily soft and comfortable to sit on for extended periods of time. Features a hidden inside pocket to store valuables away. The Cosy also has a zip extender so the user can put the zip up without assistance.

Waterproof and Spill Proof

The outer layer of the Days Wheelchair Cosy is made from waterproof material. This is great for preventing messes from spills. It can also be used to protect the user from light rain.

Keeping Warm

The Wheelchair Cosy zips closed and has a back panel. It stays in place when in use and fully covers the lower body for a warm and comfortable wheelchair experience.

- Fleece lined blanket that zips closed
- Features a waterproof outer layer
- Zipper has an extra large pull-ring
- Designed with a back panel for extra upper body warmth
- Ideal for keeping the lower body and torso warm

Scooter Cape

This practical, lightweight cape offers all-round protection for both you and your scooter. The cape is made from waterproof nylon with a chest zip and has a transparent panel so you can see the controls and ensure road users can still see your lights.

The cape offers two small openings at the front for the users hands in order to hand change or press for a lift. The openings feature an overlap to prevent water getting into the cape.

The cape comes in medium and small to ensure a perfect fit over the user and the scooter. The cape also features a hood for added protection.

Waterproof and Road Safe

Wheelchair Poncho

This poncho is a waterproof sunshade tarp for wheelchair users. Water easily slides off the poncho in the rain and covers most of the body for full protection. The Days Wheelchair Poncho is great for rainy days and is made from waterproof, lightweight nylon.

For Wheelchair Users

The Days Wheelchair Poncho is shaped to cover the user in a seated position and provides a better fit for wheelchair users. The poncho features two rear vents that go over the wheelchair handles to make it easier to push the wheelchair user.

Waterproof with Hood

- Waterproof poncho with a zip closure and hood
- Rear vents leave wheelchair handles exposed for caretakers
- Extra length poncho for near full body coverage

Scooter Storage Cover

The Days Scooter Storage cover is windproof and has an elasticated bottom to ensure it can securely tuck under the scooter when parked.

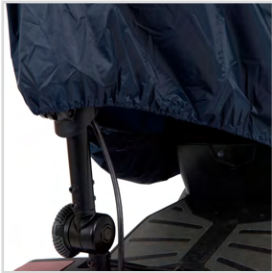

The cover is also waterproof to prevent rainwater from seeping through the material when storing the scooter. The storage cover can easily be wiped clean and is suitable for scooters, wheelchairs and power chairs.

Its universal design allows it to fit most scooters. Please check the dimensions of your scooter and the cover before purchasing. The Days Scooter Cover is easy to store and folds up for easy portability. To wash, rinse with water and wipe dry after use.

Wheelchairs

You're in the driver's seat

The World Health Organization recognizes that wheelchairs are essential for mobility, dignity and general wellbeing¹. Whether self- or attendant-propelled, your high-quality chair should enhance your mobility and safety while being easy to use and affordable. With Days, you will also have access to customer support when you need it most.

All Days Wheelchairs include the following features:

- Puncture-proof tyres to help ensure trouble-free mobility, low maintenance and a smooth ride over most surfaces
- Moulded armrests for extra comfort
- Folding for easy storage and transportation
- Wipe-clean padded seat fabric

Heavy-duty Steel Wheelchair

SELF OR ATTENDANT
PROPELLED

Designed for strength and durability

Heavy Duty Steel Wheelchairs are manufactured from heavy gauge steel with double crossbar frames and reinforced double-thickness upholstery. Height-adjustable, swing-away and removable footrests come with a calf strap and rubberised footplates for safety.

Key features

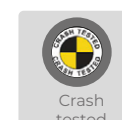

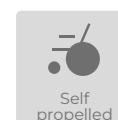

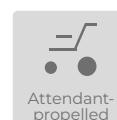

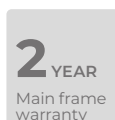

- Stainless steel skirt guards
- Chrome finish
- Optional elevating leg rests

Fully Reclining Steel Wheelchair

Fully reclining for increased comfort

Fully Reclining Steel Wheelchairs feature a hydraulic recline mechanism to support your weight so that you can recline with infinite adjustment from vertical to horizontal. Removable head support ensures comfort at every angle. The variation in angle provides the user with a change in orientation, enabling redistribution of pressure to increase comfort and sitting tolerance and reduce the risk of pressure sores. With wipe-clean seat fabric, these chairs are durable with minimum ongoing maintenance.

Key features

- Self-propelling wheels
- Chrome-plated steel frame
- Stainless steel skirt guards
- Detachable armrests and elevating leg rests

Rollators

Your guide to choosing the perfect rollator

Choosing a rollator with a frame at the correct height is essential to ensure wellbeing. Other factors to consider include where you will primarily use your rollator, the amount of support you will need, the number of wheels (three or four), portability and storage.

When taking measurements, consider the following:

- If the frame is too high, you may find it difficult to straighten your elbows and increase weight distribution through your arms.
- Your frame is too low if you are bent over with poor posture.
- Generally, the height of the handgrips should be at the level of the wrist bone when your elbows are slightly bent, at an angle of about 15° flexion.
- When measuring the height of your walking frame, wear appropriate and supportive footwear.
- If your rollator includes a seat, consider the seat height. When seated comfortably, your feet should be flat on the ground.

Lightweight 100 Series Rollator

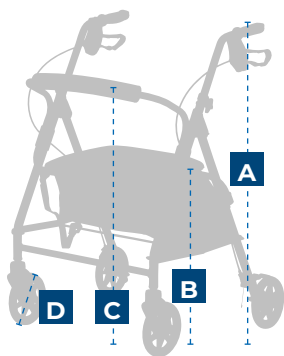

Keeping you on the move

The 100 Series Rollator is equipped with aluminium frames, combining lightweight design and robust engineering quality with a maximum user weight of 165 kg (26 st or 364¾ lb).

Key features

- Available in four sizes to accommodate a range of heights and builds
- Lockable loop brakes for security and convenience
- Adjustable brake tension to suit your needs
- Folds easily for storage and transport
- Ergonomic handgrips and adjustable height handles with five settings at 2.5-cm intervals

Crutches

All Days Crutches are made from lightweight aluminium with a tough anodised finish, making them incredibly durable and easy to use.

They are designed for minimum maintenance and only require an occasional wipe-down with a soft cloth. Disinfectant solution can be used if needed.

Crutches

How to select crutches

Factors include handle options, adjustment levels and standard features

Handle options

Standard

Standard plastic handgrips are easily wiped clean to reduce the risk of cross-contamination.

Ergonomic

Ergonomic handles were designed and developed with physiotherapists and healthcare professionals. The unique handle distributes pressure over a greater area of the user's hand, improving comfort and safety.

Comfy grip

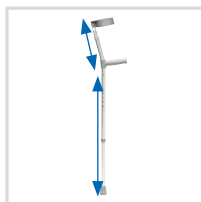

Comfy grip handles are made from soft-touch plastic to provide a more comfortable and cushioned grip — ideal for long-term use.

Adjustment levels

Single adjustable crutches

Single adjustable crutches enable you to adjust the handle height, but the distance between the handle and arm cuff is fixed.

Double adjustable crutches

Double adjustable crutches enable you to adjust the handle height and the distance between the handle and arm cuff.

Permanent crutches

Permanent crutches are not adjustable and must be cut to size to suit each user. They are ideal for long-term use.

Standard features

Closed fixed armband

The closed fixed armband enables you to retain the crutch on your arm even if you release your grip on the handle. This prevents the crutch from dropping to the floor accidentally.

Non-marking ferrules

Non-marking ferrules are slip-resistant for added safety. The 22-mm ferrules are fitted for adult crutches, while 16-mm ferrules are fitted for children's crutches.

Push-pin adjustable

Adjustment is easy using the simple push-pin operation.

Walking Sticks

Select the walking stick that is right for you

Days Walking Sticks are available in various styles. Use the guide on the following page to help you select the right walking stick for you.

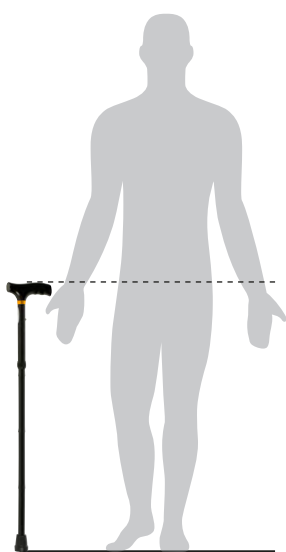

Walking Sticks

How to select walking sticks

Factors include stick height, left- or right-handed and type

Walking stick height

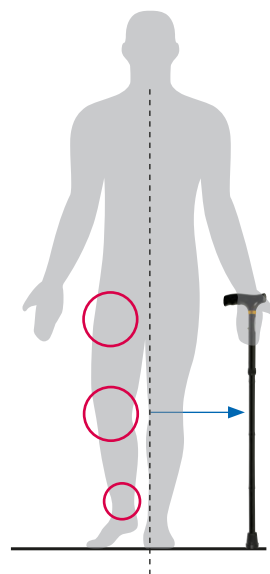

Using a walking stick at the correct height is essential. When measuring, the handle should rest on the floor while your arm is relaxed. Then, adjust or trim the stick to the crease of the wrist.

When using your walking stick, you should maintain an upright posture with the elbow slightly bent. Your body weight will be supported when you push down on the stick while walking.

If you need two walking sticks, the length should be slightly longer as they will be used ahead of the body when you are walking.

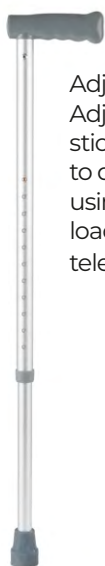

Left or right hand

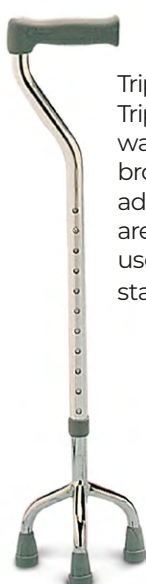

You should hold the stick in hand on the opposite side to the one that needs support if you are using a walking stick to compensate for an injury to your leg or joint on one side.

If you use the stick for balance, you can use it with either hand.

Types of walking sticks

Adjustable
Adjustable walking sticks can be modified to different heights using simple spring-loaded catches and telescopic shafts.

Tripod and tetrapod
Tripod and tetrapod walking sticks have a broad footprint to provide additional stability. These are best suited for heavier users who require a more stable base.

Folding walking sticks
Folding walking sticks are lightweight metal sticks with sectioned shafts that enable you to fold them for storage. For example, you may transport them within a handbag. Strong elastic runs inside the shaft to ensure that the stick remains stable in its open position.
